

[Internal Report – Dr. Chelsey Dalman, Acheron Medical Division]

Subject: Neurological Irregularities in Personnel

Date: 19-07-2424

Status: Ongoing – Restricted Distribution

Summary

Personnel in deep-sector operations—primarily miners—are exhibiting **unusual cognitive disturbances**. **Auditory distortions, dissociation, obsessive behaviors**. Then it gets worse. **Hallucinations. Speech irregularities. Sudden, violent actions.** Aegis Command has dismissed it as **environmental stress**. That doesn't explain the symbols. That doesn't explain the **self-terminations**.

Notable Cases

- **C-086 (Engineer, Stratum 4B):** Found tracing **geometric symbols** across corridor walls. **Unresponsive. Nonverbal.**
- **R-221 (Security Officer, Refinery Outpost Theta):** Entered an airlock. **Cycled it.** Personal logs contain **pages of writing in an unknown language.**
- **T-112 (Surveyor, Deep-Stratum Division):** Reported "**time distortion.**" Later **removed their ocular implants.** [REDACTED]
- **██████ (Head of Voidstone Research):** Most responsive of the subjects. It seems more coherent than the rest. Exhibiting signs of extreme megalomania and devotion to an "entity." Shows a desire to take control of the universe. Speaks of freeing the Void Dragon. The subject's intelligence and computation seem to have been dramatically enhanced. Displays biological and physical knowledge millennia beyond that of humanity. We have run tests on the subject's 'discoveries' and have found positive results. **(Entire page seems to have been ripped out.)**
(Designated Cult leader)

Findings & Actions

No confirmed toxins, radiation exposure, or pathogens. **Symptoms do not match any known neurological disorder.** However, [REDACTED] has exhibited similar responses in controlled conditions. If this continues, **containment measures may be necessary.**

Psych evaluations are mandatory for all deep-sector personnel. Work rotations are to be adjusted. **All further cases are to be classified under Level 3 clearance.**

Conclusion

There is no confirmed cause. No solutions. **Further reports are being buried.**

¹End of Report.

¹ *I know this won't be read by the right people. Or maybe it will, but nothing will change. They've buried data like this before. But this... this is different. We are seeing an **anomalous neural response** tied directly to prolonged **voidstone exposure**—it's not just "stress." It's something worse. **Temporal dissonance, linguistic anomalies**—the subjects, they're **changing**, their cognition is warping in ways I can't explain. There's no **neurochemical explanation** for it, no pathogen, no contaminant. They're*

hiding something, and it's spreading. The Corruption is real. Don't trust the reports. If you're reading this, consider it your warning. They're silencing everyone who knows. Something big is coming.
